ISSUED

2026 Quality Policy Statement (ISO9001:2015)

Scintacor is a global leader in phosphor and scintillation technologies, specialising in the research and development of innovative products and processes.

The Senior Management Team is committed to meeting customer expectations for quality, health and safety, on-time delivery, innovation and product performance. These commitments are supported by a clear business strategy, defined objectives and ongoing monitoring of key activities.

Scintacor operates a Quality Management System that complies with the requirements of ISO 9001:2015, and we are dedicated to continually improving both our operations and the effectiveness of the Quality Management System to ensure we consistently meet or exceed customer expectations.

The Quality Policy is reviewed annually by Senior Management and communicated throughout the organisation, and is also available externally to interested parties upon request. All employees receive appropriate training and support to ensure the Quality Management System is fully understood, implemented and consistently applied across the business
